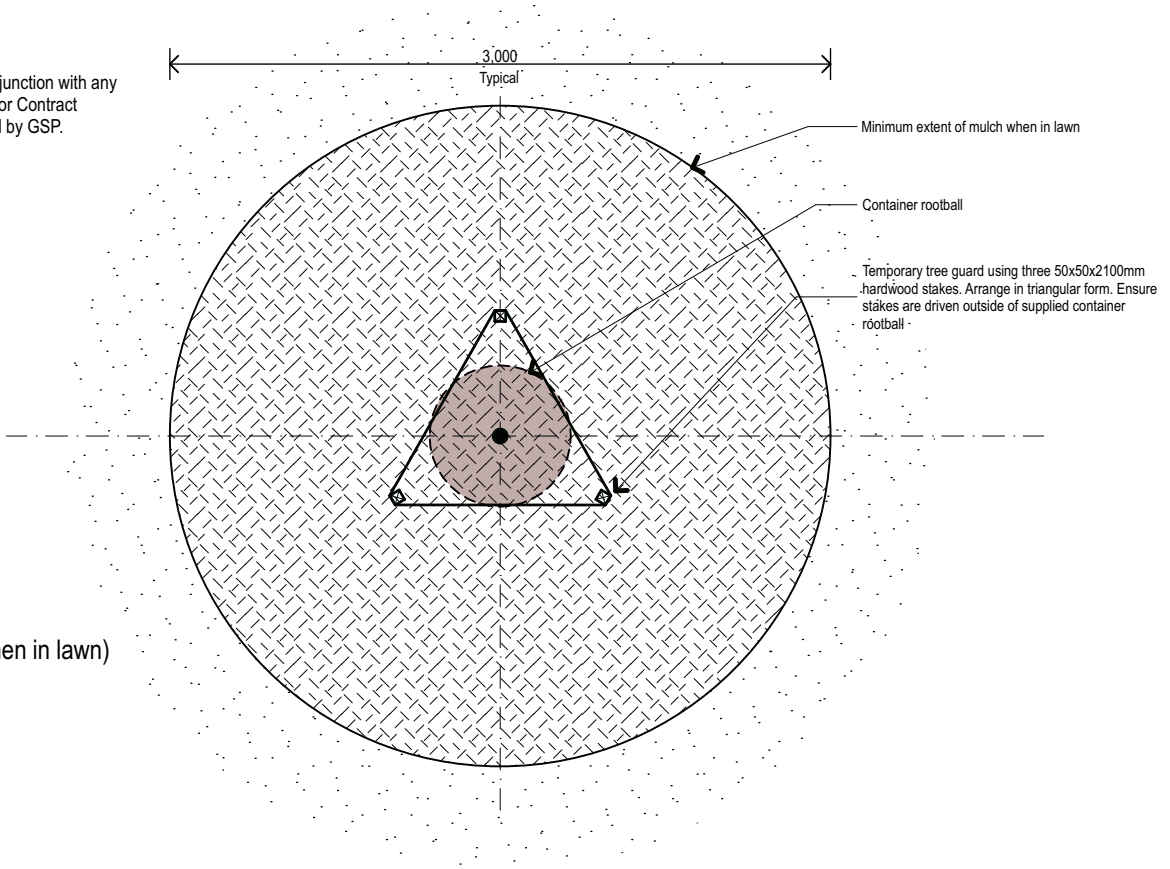
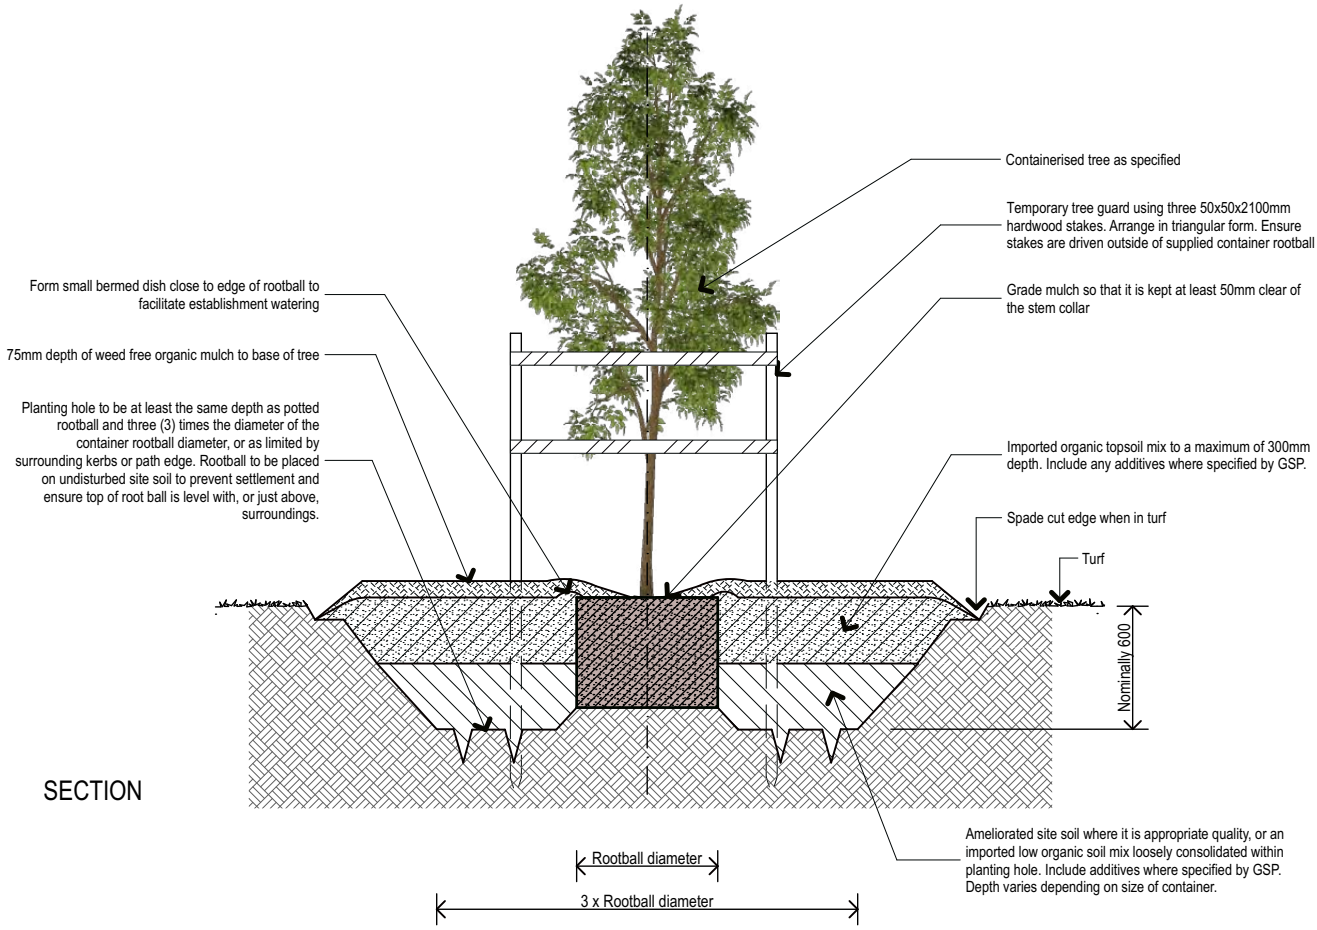
NOTE:
Detail to be read in conjunction with any site specific conditions or Contract Documentation issued by GSP.



PLAN (When in lawn)



SECTION

8.6 Event Planning & Tree Protection Information Sheet

Overview

Trees are a significant component of Callan Park, directly related to its heritage significance. It is the responsibility of the event organiser to protect the Park's trees in the course of planning and holding an event.

Trees are easily damaged particularly during bump-in and bump-out due to:

- Vehicle or equipment impact.
- Soil compaction within the root zone.

Trees are easily damaged during the event by event staff, contractors or patrons, through:

- Inappropriately attaching things to trees.
- Vehicle or equipment impacts.
- Breaking branches, trunks and foliage.
- Spilling or dumping chemicals.
- Compacting soil within the root zone.

Trees may also present risks to patrons in the event of extreme weather conditions such as storms or high winds.

To ensure the best outcome for your event and the ongoing health of our trees please consider the following points.

Prior to your event

Prepare and submit to GSP an Event Plan including a site plan showing:

- Proposed equipment layout, vehicular and pedestrian access routes and provision for appropriate offsets for safe clearance to trees.
- Proposed bump-in / bump-out routes to avoid trafficking in close proximity to trees. Note that only some roads and paths within the Park have appropriate clearances for vehicles above 3.6m in height. Vehicles higher than this need to have defined access routes agreed prior to the event.
- Locations for heavy items such as generators and cool rooms well clear of trees.
- Major pedestrian and vehicular routes to avoid trees.
- Tree and ground protection as required by GSP.

During your event

- Install tree and ground protection as per the approved event site plan.
- Brief all contractors and event staff on the importance of tree protection.
- Establish bump-in / bump-out routes to avoid trafficking under or in close proximity to trees.
- Ensure a GSP representative acts as a 'spotter' to observe and direct all heavy vehicle movement and equipment installation in the vicinity of trees .
- Arrange alternative access if the truck cannot safely fit under tree branches. No tree branches are to be pruned or snapped off.
- Do not tie or affix signage, lighting or anything else to trees.
- No branches or foliage shall be damaged or removed to facilitate equipment installations.
- Heavy equipment shall be installed as per the approved event plan on appropriate ground protection.
- Ensure generators are located at least 10m from trees and exhaust emits away from trees and foliage.
- Keep bulk fuel stores a minimum of 15 metres away from any tree.
- Undertake refuelling a minimum of 10 metres from any tree. Appropriate bunding and ground protection is required during all refuelling operations regardless of distance to trees.
- Keep a 'fuel spill management kit' on hand at the location of any refuelling activities.
- Ensure refuelling is carried out by a team of two people.
- Event security is to ensure patrons do not climb or damage trees.
- In the event of extreme weather conditions such as storms or high winds the event shall be suspended and the site evacuated in accordance with the Emergency Management Plan.

After your event

Ensure all bump-out activities in proximity to trees, take equal care as the bump-in and set up.

GSP may impose monetary bonds and or penalties for event related damages to trees, grounds and other GSP assets, as per the event deed of agreement.

8.9 Schedule of Trees Within Callan Park (Including Broughton Hall)

The following pages provide a schedule that itemises all trees (as at November 2025) within Callan Park and Broughton Hall. (Note that it typically excludes trees within the identified bushland and restoration areas).

Tree ID	Trees in Group	Historical Tree	Family	Genus	Tree Species	Common Name	Height (m)	Spread Average (m)	Trunk Diameter Standard Height (dsh) (m)	Trunk Diameter at base (dgl) (m)	Notional NRZ radius (m) 12xdsh (AS 4970)	Nominal SRZ radius (m) (AS 4970)	Age Class	Current Vigour	Current Form	Tree Origin	Tree Type	Noted Defects	ULE Rating	Significance Rating	General Comments and Notes	QTRA Risk of Harm Calculation	QTRA Risk of Harm Category	Short Term Management Recommendation
3300	1		*Oleaceae*	*Fraxinus*	*Fraxinus angustifolia*	**Narrow-leaf Ash**	8.0	6.0	0.24	0.30	2.88	2.00	Mature	Fair	Average	Exotic	Deciduous	Deadwood-Minor	Medium (15-40 years)	**Low**	Street tree along Balmain Road. (syn.F.oxycarpa)	1 in 1 million	Broadly Acceptable	
3301	1	yes	*Moraceae*	*Ficus*	*Ficus rubiginosa*	**Port Jackson Fig**	14.5	17.0	1.23	1.30	14.76	3.69	Mature	Excellent	Average	Endemic	Evergreen		Long (>40 years)	**Exceptional**	Prominent street tree along Balmain Road.	1 in 1 million	Broadly Acceptable	
3302	1	yes	*Myrtaceae*	*Lophostemon*	*Lophostemon confertus*	**Brush Box**	12.5	9.0	0.48	0.60	5.76	2.67	Mature	Fair	Average	Native	Evergreen	Deadwood-Major, Major Wounding	Long (>40 years)	**High**	Significant trunk wounding to north side. Street tree along Balmain Road within footpath. Likely to be part of historic early planting.	1 in 1 million	Broadly Acceptable	
3303	1		*Arecaceae*	*Phoenix*	*Phoenix canariensis*	**Canary Island Date Palm**	12.0	6.0	0.39	0.92	4.00	1.46	Mature	Good	Average	Exotic	Palm-SingleStem		Long (>40 years)	**High**		1 in 1 million	Broadly Acceptable	
3304	1	yes	*Moraceae*	*Ficus*	*Ficus rubiginosa*	**Port Jackson Fig**	18.0	21.0	1.93	1.93	15.00	4.36	Mature	Excellent	Average	Endemic	Evergreen		Long (>40 years)	**Exceptional**	Numerous aerial roots.	1 in 1 million	Broadly Acceptable	
3305	1	yes	*Elaeocarpaceae*	*Elaeocarpus*	*Elaeocarpus obovatus*	**Hard Quandong**	15.0	17.0	1.39	1.39	15.00	3.80	Mature	Fair	Excellent	Native	Evergreen		Long (>40 years)	**High**		1 in 1 million	Broadly Acceptable	
3306	1		*Altingiaceae*	*Liquidambar*	*Liquidambar styraciflua*	**Liquidambar**	13.5	13.0	1.08	1.20	12.96	3.57	Mature	Fair	Average	Exotic	Deciduous	Epicormic Growth, Root Impacts	Long (>40 years)	**Moderate**	Long pruning stubs and now extensive epicormic growth. Roots impacting with road and parking area.	1 in 500,000	Tolerable	Monitor annually
3307	1		*Myrtaceae*	*Callistemon*	*Callistemon viminalis cv.*	**Weeping Bottlebrush**	10.0	7.0	0.34	0.42	4.08	2.30	Mature	Fair	Average	Native	Evergreen	Very Asymmetric Form, Root Impacts	Medium (15-40 years)	**Low**	Pruned for overhead wires. Asymmetric to east. Girdling roots.	1 in 1 million	Broadly Acceptable	
3308	1		*Sapindaceae*	*Acer*	*Acer negundo*	**Box Elder**	10.0	9.0	0.26	0.33	3.12	2.08	Mature	Fair	Average	Exotic	Deciduous	Deadwood-Minor, Epicormic Growth	Medium (15-40 years)	**Low**	Nest box installed at 4m. Fused branches. Somewhat invasive species.	1 in 1 million	Broadly Acceptable	
3309	1		*Elaeocarpaceae*	*Elaeocarpus*	*Elaeocarpus reticulatus*	**Blueberry Ash**	8.5	6.0	0.22	0.31	2.64	2.02	Mature	Fair	Average	Endemic	Evergreen	Very Asymmetric Form	Medium (15-40 years)	**Low**	Asymmetric to west.	1 in 1 million	Broadly Acceptable	Remove in Longer Term
3310	1		*Myrtaceae*	*Syzygium*	*Syzygium paniculatum*	**Magenta Cherry**	16.0	12.0	0.57	0.68	6.84	2.81	Mature	Good	Average	Native	Evergreen		Long (>40 years)	**High**		1 in 1 million	Broadly Acceptable	
3311	1		*Myrtaceae*	*Syzygium*	*Syzygium jambos*	**Rose-Apple**	10.0	9.0	0.64	0.64	7.68	2.74	Mature	Fair	Average	Native	Evergreen	Co-dominant Stems, Deadwood-Minor	Medium (15-40 years)	**Low**	Myrtle rust evident on some outer limbs and fruit.	1 in 1 million	Broadly Acceptable	
3312	1		*Myrtaceae*	*Syzygium*	*Syzygium jambos*	**Rose-Apple**	10.0	9.0	0.49	0.71	5.88	2.87	Mature	Good	Average	Native	Evergreen	Deadwood-Major, Major Wounding, Epicormic Growth, Decay-Minor, Co-dominant Stems	Medium (15-40 years)	**Low**		1 in 1 million	Broadly Acceptable	
3313	1	yes	*Araucariaceae*	*Araucaria*	*Araucaria bidwillii*	**Bunya Pine**	26.0	9.0	0.97	1.10	11.64	3.44	Mature	Excellent	Excellent	Native	Conifer		Long (>40 years)	**Exceptional**		1 in 1 million	Broadly Acceptable	
3314	1		*Anacardiaceae*	*Schinus*	*Schinus areira*	**Peppercorn Tree**	9.0	8.0	0.40	0.60	4.80	2.67	Over-mature	Fair	Poor	Exotic	Evergreen	Epicormic Growth, Decay-Major, Very Asymmetric Form, Cavity	Short (5-15 years)	**Low**	Basal cavity and hollow. Asymmetric form to north. Risks considered tolerable.	1 in 100,000	Tolerable	Monitor annually
3315	1		*Anacardiaceae*	*Schinus*	*Schinus areira*	**Peppercorn Tree**	8.0	8.0	0.50	0.60	6.00	2.67	Over-mature	Fair	Average	Exotic	Evergreen	Cavity, Decay-Major, Epicormic Growth	Short (5-15 years)	**Low**	Major hollow and decay to base. Risks considered tolerable.	1 in 100,000	Tolerable	Monitor annually
3316	1		*Ulmaceae*	*Celtis*	*Celtis sinensis*	**Chinese Hackberry**	10.0	12.0	0.53	0.63	6.36	2.73	Mature	Good	Average	Invasive	Deciduous	Root Impacts, Very Asymmetric Form	Long (>40 years)	**Low**	Nest box at 4m. Asymmetric to north-east. Major surface roots evident surrounding tree. Invasive species - should plan to remove and replace with more appropriate species.	1 in 1 million	Broadly Acceptable	Remove in Longer Term
3317	1		*Bignoniaceae*	*Jacaranda*	*Jacaranda mimosifolia*	**Jacaranda**	10.0	9.0	0.38	0.48	4.56	2.43	Mature	Fair	Average	Exotic	Semi-Deciduous	Very Asymmetric Form, Branch Tearouts, Deadwood-Minor	Long (>40 years)	**Moderate**	Asymmetric to east.	1 in 1 million	Broadly Acceptable	
3318	1		*Bignoniaceae*	*Jacaranda*	*Jacaranda mimosifolia*	**Jacaranda**	10.0	9.0	0.36	0.41	4.32	2.28	Mature	Fair	Average	Exotic	Semi-Deciduous	Lean-Major, Very Asymmetric Form, Epicormic Growth	Long (>40 years)	**Low**	Major lean and asymmetric to west.	1 in 1 million	Broadly Acceptable	
3319	1		*Proteaceae*	*Grevillea*	*Grevillea robusta*	**Silky Oak**	22.0	14.0	0.86	1.08	10.32	3.42	Mature	Fair	Average	Native	Evergreen		Medium (15-40 years)	**Moderate**	Fig root wrapping over root zone and next to trunk. Very large tree but somewhat invasive species.	1 in 1 million	Broadly Acceptable	Remove in Longer Term
3320	1		*Bignoniaceae*	*Jacaranda*	*Jacaranda mimosifolia*	**Jacaranda**	10.0	12.0	0.53	0.62	6.36	2.71	Mature	Good	Average	Exotic	Semi-Deciduous	Lean-Major	Long (>40 years)	**Moderate**	Nest box at 4m. Trunk base leaning to north.	1 in 1 million	Broadly Acceptable	
3321	1		*Fabaceae*	*Bauhinia*	*Bauhinia variegata*	**Orchid Tree**	8.0	5.0	0.17	0.28	2.04	1.94	Semi-mature	Fair	Poor	Exotic	Deciduous	Co-dominant Stems	Medium (15-40 years)	**Nil / Remove**	Small insignificant tree. Multi-trunked from base.	1 in 1 million	Broadly Acceptable	Remove
3322	1	yes	*Moraceae*	*Ficus*	*Ficus macrophylla*	**Moreton Bay Fig**	22.0	32.0	3.45	5.40	15.00	6.72	Mature	Excellent	Average	Native	Evergreen	Branch Tearouts, Deadwood-Minor, Decay-Minor, Epicormic Growth	Long (>40 years)	**Exceptional**	Exceptional and very large tree. Multi-trunked with numerous aerial roots now propping large trunks.	1 in 1 million	Broadly Acceptable	
3323	1		*Bignoniaceae*	*Jacaranda*	*Jacaranda mimosifolia*	**Jacaranda**	19.0	14.0	0.60	0.70	7.20	2.85	Mature	Fair	Average	Exotic	Semi-Deciduous	Very Asymmetric Form, Deadwood-Minor, Epicormic Growth	Long (>40 years)	**Moderate**	Very asymmetric to north. Nest box at 4m	1 in 1 million	Broadly Acceptable	
3324	1		*Malvaceae*	*Lagunaria*	*Lagunaria patersonia*	**Norfolk Island Hibiscus**	14.0	12.0	0.73	0.81	8.76	3.03	Mature	Good	Average	Exotic	Evergreen	Co-dominant Stems	Long (>40 years)	**Moderate**	Somewhat undesirable species in public parkland setting, although large specimen in good health hence moderate rating.	1 in 1 million	Broadly Acceptable	
3325	1		*Myrtaceae*	*Eucalyptus/Corymbia*	*Corymbia maculata*	**Spotted Gum**	21.5	17.0	0.76	0.96	9.12	3.25	Mature	Good	Average	Native	Evergreen		Long (>40 years)	**High**	Unusual bark shedding texture and underlying trunk texture but no signs of dysfunction.	1 in 1 million	Broadly Acceptable	
3326	1		*Proteaceae*	*Grevillea*	*Grevillea robusta*	**Silky Oak**	13.0	8.0	0.19	0.30	2.28	2.00	Mature	Fair	Poor	Native	Evergreen	Root Impacts, Deadwood-Major	Medium (15-40 years)	**Nil / Remove**	Trunk base lying down on rock shelf for 2m before kinking and turning vertical. Somewhat invasive species.	1 in 1 million	Broadly Acceptable	Remove
3327	1		*Altingiaceae*	*Liquidambar*	*Liquidambar styraciflua*	**Liquidambar**	15.0	17.0	0.77	1.10	9.24	3.44	Mature	Fair	Average	Exotic	Deciduous	Root Impacts	Long (>40 years)	**Moderate**	Appears to have occupied and been grown in constraining planter box that has been long dismanted. Extensive root flare base. Growing in very close proximity to building.	1 in 1 million	Broadly Acceptable	
3328	1		*Bignoniaceae*	*Jacaranda*	*Jacaranda mimosifolia*	**Jacaranda**	7.0	4.0	0.10	0.13	2.00	1.40	Mature	Good	Average	Exotic	Semi-Deciduous		Long (>40 years)	**Moderate**	Memorial tree to Steve Douglas - mental health nurse.	1 in 1 million	Broadly Acceptable	
3329	1		*Myrtaceae*	*Eucalyptus/Corymbia*	*Corymbia maculata*	**Spotted Gum**	19.0	13.0	0.70	0.89	8.40	3.15	Mature	Good	Excellent	Native	Evergreen	Deadwood-Minor	Long (>40 years)	**High**		1 in 1 million	Broadly Acceptable
